

AF **50Hz**
SERIES
SUBMERSIBLE SEWAGE
WASTEWATER PUMPS

FEATURES

- Pump body is made of cast iron and with high solids epoxy coating which offers the highest quality and performance.
- Triangular handle is designed for easy handling on Guide Rail System (model above 5HP).
- Oil Elevation Disk design in the oil chamber to ensure the mechanical seals lubrication and to extend the service life of pump.
- Eco-friendly Food Grade Lubricant to keep wastewater applications a toxic free environment.
- Non-clogging impeller designs :

U Type Vortex Impeller	P Type Open Impeller	E Type Channel Impeller
		
U type non-clogging impeller produces a vortex (whirlpool effect) which allows slurry, long fibrous materials and solid waste to pass through, without contact with the impeller.	P type impeller is open and comes with one or two vanes. The impeller is excellent to use for waste materials to prevent clogging.	Enclosed channel impeller features high efficiency, large capacity, large solid passage and non-clogging.

APPLICATIONS

- Residential buildings, hospitals, commercial buildings and household usages.
- Livestock farming, pig farming, dairy farming and sewage treatment.
- Food industry, pulp and paper industry, mining, dyeing and finishing factory, leather factory, steel manufacturer, electronics industry and wastewater treatment.
- Hydraulic engineering and flood control.
- Sanitary sewer pumping.

AF-10xx ~ AF-16xx (GRS)

HEAVY DUTY SUBMERSIBLE PUMPS

PRODUCT NOMENCLATURE

AF	16	50
Type	Discharge inch	HP

Motor Thermal Sensor(MTS)

MTS is a bimetal strip sensor embedded in each phase of the stator winding to sense motor from overheating and cause of electrical motor failure. MTS must be connected to control panel, and circuit is Normal : closed; Abnormal: open. MTS is a standard on 15HP and above models, optional on 2~10HP AF models.

Cooling Jacket

A cooling jacket enables a portion of liquid flows through around the motor frame to reduce motor frame temperature during operating. The Cooling Jacket is a standard on component for AF-10xx ~ AF-16xx models.

Bearing Temperature Sensor(BTS)

BTS is a Resistance temperature sensor to measure temperature for lower stationary bearing. BTS must be connected to indicator of temperature control panel, and when the temperature is higher than a pre-settled temperature (100°C recommended), the Control Panel need to cut off power to prevent bearing damage. BTS is an optional component for AF-10xx ~ AF-16xx models.

Moisture Sensor (MS)

MS is Electrode sensor installed in the Mechanical seal chamber to detect water entering cause seals failure, and to prevent water penetrates motor to cause of electrical motor failure. MS must be connected to control panel, and circuit is Normal : open; Abnormal: closed. MS is a standard on 15HP and above models, optional on 2~10HP AF models.

SPECIFICATIONS (Discharge 150~400mm)

Item	Description	
Limits of Use	Liquid Temp.	0~40°C (32~104°F)
	Applications	Wastewater • Sewage • Industrial Wastewater
Type	Frequency	50Hz
	Motor	4P (1500rpm) / 6P (1000rpm) • Dry Motor
	Insulation	Class H
	Protection	IP68
	Protector	MTS & MS
	Bearing	Ball type
	M.seal	Double M.seals
	Impeller	Channel (E)
Material	Upper Cover	FC200
	Motor Frame	FC200
	Shaft	SUS420J2
	M.seal	CA/CE & SiC/SiC • SiC/SiC & SiC/SiC
	Casing	FC200
	Impeller	FC200
	Cable	VCT/PNCT/H07RN-F
Optional	Pumps can be customized to fit specifications	

ACCESSORIES : ELBOW / GRS-GUIDE RAIL SYSTEMS

ELBOW

GRS

AF pumps can be installed with 90° Elbow Flange outlet or GRS guide rail system, to have easier / safer installation or removal during replacement and maintenance.

PRODUCT FEATURES

High Efficiency Dry Motor

All stator coils are treated with insulating varnish procedures to achieve the best insulation, efficiency and durability.

Epoxy Cable Base

An epoxy resin seal cable base prevents moisture from entering the motor through the core wires.

Double Mechanical Seals

Superior abrasion resistant mechanical seal is manufactured with silicon carbide to ensure the best seal effect.

Auto-cut Protector

Automatic On/Off motor protector to prevent motor burn out due to high temperature and excess amperage draw. The Protector can revert when the motor temperature returns to normal. Auto-cut Protector is a standard component for pump 10HP or below.

High Solids Epoxy Coating

High Solids Epoxy Coating greater than 100 μm , provides resistance to salty sea water, industrial wastewater, and chemical fluids, creating an anti-corrosion layer on metal surface that prevents corrosion.
